

KYRYL HORBUSHKO

SOFTWARE ENGINEER

WITH 10+ YEARS OF EXPERIENCE

iOS-focused mobile engineer with deep expertise in building scalable, high-performance applications. Strong in problem-solving, debugging, and translating complex requirements into clean, maintainable code. Experienced across the full software development lifecycle, with a solid foundation in agile practices, software architecture, and modern design principles. Committed to clean code, thoughtful system design, and long-term maintainability.

Continuously learning and experimenting with new technologies, with a pragmatic, results-driven approach to delivering value. Known for curiosity, analytical thinking, and a bias toward action.

EDUCATION

National University of radio electronics,
Kharkiv, Ukraine

- Specialist in Production of electrical devices for banking system (2011)

HOBBY

- running
- reading
- programming

SKILLS

Programming Languages

- Swift/Objective-C (expert)
- Kotlin/javaScript
- dart
- c#

Platform Expertise

Expert-level knowledge in Native iOS (Swift, Objective-C)

Good level knowledge in Android (Kotlin, Java), and Cross-Platform frameworks (Flutter).

Domain expertise

- information technology and services
- consumer electronics
- Internet of things (IoT), ble devices
- medical devices and healthcare,
- government and eGovernment,
- eLearning
- banking and finance

Languages

- Ukrainian (native speaker)
- English (B2)

Awards

- IntelliPerson (Intellias, 2022)
- Most valuable players (Intellias, 2020)
- Respect. Recognize. Reward (Jabil 2013)

EXPERIENCE

MOBILE ENGINEERING LEAD /
TECH LEAD AT INTELLIAS

SOFTWARE DEVELOPER
AT HEBRONSOFT

SOFTWARE DEVELOPER
AT BLINKTROLL

SENIOR SOFTWARE DEVELOPER /
TEAM LEAD AT SIGMA SOFTWARE
UKRAINE

IOS COURSE TEACHER
AT SIGMA UNIVERSITY UKRAINE

SOFTWARE ENGINEER
AT THINKMOBILES

Mobile Engineering Lead / TechLead | 6 y.

RESPONSIBILITIES: Full iOS development lifecycle, analyse, estimate, develop, review, testing, bug fixing and release products, Architecture design and business logic implementation of product. Team cooperation, planning and direct communication with the customer. Continuous interaction with design, back-end and management teams.

TECHNOLOGIES: CI & CD (TeamCity, Jenkins, GitLab CI), MVVM, Native SDK, CoreData, AVFoundation, HealthKit, RTL/LTR, REST, fastlane, SwiftLint, pecker etc

Software Developer | 1 y.

RESPONSIBILITIES: Full iOS development lifecycle using modern approach

TECHNOLOGIES: Swift, SwiftUI, Charts, alamofire, SPM

Software Developer | 2 y.

RESPONSIBILITIES: Full software stack development – from firmware to device to mobile app

TECHNOLOGIES: Unity, eclipse (c++), beaglebone blue, flutter (dart), linkit smart 7688, assembly process docs

Senior Software Developer | 3 y.

RESPONSIBILITIES: Architecture and database design, full development lifecycle and testing apps, providing new technologies and frameworks into existing projects. Pre-sales analysis, estimation, technical leadership, providing new technologies and frameworks into existing projects. API extension design, security analysis and improvement, performance. Business requirements capturing and decomposition. Cross-platform product development. AppStore publication and communication with App Review Team, Mentor for new team members.

TECHNOLOGIES: CI & CD (TeamCity, Jenkins), MVVM, MVC, VIPER, CleanSwift, Native SDK, CoreData, Realm, REST, AES CTR 128, CoreBluetooth, Xamarin, fastlane, SwiftLint, pecker etc

Course Teacher | 2 y.

RESPONSIBILITIES: Prepare and conducting course «Programming for iOS»

Software Engineer | 3 y.

RESPONSIBILITIES: Full iOS development lifecycle, code review, testing and bug fixing. Architecture design and business logic implementation of product. Team cooperation, planning and direct communication with the customer. Requirements analysis and estimation. Continuous interaction with design, back-end and management teams.

TECHNOLOGIES: Native SDK, OpenGL ES 2.0, SpriteKit, CoreBluetooth, CoreData, AVFoundation, CoreAnimation, AWS (Dynamo DB, SMS, S3, analytic ets), RTL/LTR , various social integration (fb, google, twitter, yahoo, flickr, tumblr etc), various 3rd partly libs (analytics (fabric, appCenter, appSee, mixPanel etc)), Encryption (AES256 with CommonCrypto), DragonSpeechKit, openCV, ffmpeg, libdlib++, .zip, rocketSocket, nordic SDK, Autodesk fix SDK etc)

EXPERIENCE (NON IT)

TRANSLATOR
AT FABULA | ARTHUSS

INDUSTRIAL ENGINEER
AT JABIL CIRCUIT UKRAINE LIMITED

Technical translator | 2 y.

RESPONSIBILITIES: Technical translation of books

Industrial Engineer II | 3 y.

RESPONSIBILITIES: Design, develop, test, and evaluate integrated systems for managing industrial production processes including human work factors, quality control, inventory control, logistics and material flow, cost analysis, and production coordination.
